## **DETAILED ACTION**

### ***Information Disclosure Statement***

The information disclosure statement filed 6/15/2005 fails to comply with 37 CFR 1.98(a)(1), which requires the following: (1) a list of all patents, publications, applications, or other information submitted for consideration by the Office; (2) U.S. patents and U.S. patent application publications listed in a section separately from citations of other documents; (3) the application number of the application in which the information disclosure statement is being submitted on each page of the list; (4) a column that provides a blank space next to each document to be considered, for the examiner's initials; and (5) a heading that clearly indicates that the list is an information disclosure statement. The information disclosure statement has been placed in the application file, but the information referred to therein has not been considered. No list is present in the application.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4 7 and 8 are rejected under 35 U.S.C. 102(b) as being anticipated by Chang et al (5,501,704, hereinafter Chang).

Claims 1 and 4 - figure 1 sets forth an apparatus for irradiating a patient with modulated microwave radiation. The device uses a frequency below 1 GHz and preferably between 1 MHz and 900 MHz with a modulation frequency between 0.1 Hz and 10 KHz. Applicant's attention is invited to column 7 lines 13-22. The area of the antenna is about 5 cm by 5 cm and the power is set forth between 1 microwatt and 50 Watts. When the power is selected to be 1 microwatt (1microWatt/25 cmcm) the value would be less than 3.6 microwatts/cmcm.

Claim 2 - treatment time periods of one hour are set forth in column 14 line 59.

Claim 3 - column 24 line 15-26 sets forth a method of treating for 30 minutes a day for a length of six weeks for a total of 21 hours of treatment.

Claim 7 - the antenna -13- is portable.

Claim 8 - no structure is set forth to perform the recited function. The device of Chang provides the same function as set forth in column 24 lines 15-26.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 5 and 11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Chang et al (5,501,704, hereinafter Chang).

Claim 5 - the oscillator -11- produces microwave radiation as claimed but only sets forth a single generator. Duplicating the components of a prior art device is a design consideration within the skill of the art. In re Harza, 274 F.2d 669, 124 USPQ 378 (CCPA 1960). It would have been obvious to one of ordinary skill in the medical arts at the time the invention was made to provide two oscillators as set forth by Chang to allow for treatment of two patients at the same time. Such duplication would provide an expected result and have a high expectancy of success.

Claim 11 - the antenna -13- is portable.

#### ***Allowable Subject Matter***

Claims 6, 9, 10 and 12 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

#### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US Patents 4,974,587, 5,344,435 and 5,441,532 teach related microwave therapy devices.
